Chemical warfare - Wikipedia Chemical warfare (CW) involves using the toxic properties of chemical substances as weapons. This type of warfare is distinct from nuclear warfare and biological warfare, which together make up NBC, the military acronym for nuclear, biological, and chemical (warfare or weapons), all of which are considered "weapons of mass destruction" (WMDs. Chemical Warfare: What are the Types of Chemical Weapons? Injury from chemical weapon agents, known as CWAs, may result from industrial accidents, military stockpiling, war, or a terrorist attack. Industrial accidents are a significant potential source of exposure to chemical agents. Chemicals such as phosgene, cyanide, anhydrous ammonia, and chlorine are. Chemical weapons in World War I - Wikipedia The widespread use of these agents of chemical warfare, and wartime advances in the composition of high explosives, gave rise to an occasionally expressed view of World War I as "the chemist's war" and also the era where "weapons of mass destruction" were created.

Chemical Warfare and Medical Response During World War I On other aspects of chemical warfare research during the period, see Sarah Jansen, "Chemical-Warfare Techniques for Insect Control: Insect Pests in Germany Before and After World War I," Endeavour 24 (2000): 28-33. Chemical Warfare - Spartacus Educational Read about the Chemical Warfare that the United States used during the Vietnam War. As well as explosive bombs the United States Air Force dropped a considerable number of incendiary devices. The most infamous of these was napalm, a mixture of petrol and a chemical thickener which produces a tough sticky gel that attaches itself to the skin. Chemical Warfare: Poison Gases in World War 1 | Compound ... Click to enlarge I'll be accompanying some of the students from my school on a history trip to Ypres and a few other World War 1 battlefields in a few weeks' time. Obviously, they'd much rather be learning chemistry, so I've been reading up on the different chemical agents used during World War 1, and this graphic is a byproduct of that. As it.

Chemical warfare - Simple English Wikipedia, the free ... Chemical warfare. Chemical warfare means using chemical compounds in war to injure or kill people. The chemicals used for chemical warfare are poisonous. Chemical warfare has been used since the Stone Age. Since 1899, several international laws have said that using chemical weapons is illegal. When Chemicals Became Weapons of War 100 Years of ... The chlorine attack may have come out of the blue for the soldiers on the ground, but the idea of chemical warfare was not new to military strategists. What is a Chemical Weapon? | OPCW The use of riot control agents as a method of warfare is prohibited by the CWC. Chemical Weapon Components The Convention defines each component of a chemical weapon as a chemical weapon whether assembled or not, stored together or separately. A toxic chemical and delivery system, for example, may be stored separately, each in and of itself less than a fully developed weapon but each.

Brief History of Chemical Weapons Use - OPCW The OPCW strives to fulfil the Convention's mandate to end the development, production, stockpiling, transfer and use of chemical weapons; to prevent their re-emergence; to ensure the elimination of existing stocks of such weapons; and, in so doing, to make the world safe from the threat of chemical warfare.
